Student Consultation and Communication

University staff receive many emails each day. In order to enable them to respond to your emails appropriately and in a timely fashion, students are asked to observe basic requirements of professional communication:

*Please ensure that you include your full name and student number and identify your practical class or tutorial group in your email so that staff know who they are communicating with and can follow-up personally where appropriate.*

**Consider what the communication is about**
- Is your question addressed elsewhere (e.g. in the subject outline or, on the eLearning site)?
- Is it something that is better discussed in person or by telephone? This may be the case if your query requires a lengthy response or a dialogue in order to address. If so, see consultation times above and/or schedule an appointment.
- Are you addressing your request to the most appropriate person?

**Specific email subject title to enable easy identification of issue**
- Identify the subject code of the subject you are enquiring about (as staff may be involved in more than one subject) put this in the email subject heading. Add a brief, specific query reference after the subject code where appropriate.

**Professional courtesy**
- Address the staff member appropriately by name (and formal title if you do not yet know them).
- Use full words (avoid ‘text-speak’ abbreviations), correct grammar and correct spelling.
- Be respectful and courteous.
- Allow 3 – 4 working days for a response before following up. If the matter is legitimately urgent, you may wish to try telephoning the staff member (and leaving a voicemail message if necessary) or inquiring at the School Office.

Section A: General Information

Subject Learning Outcomes

On completion of this subject, students should be able to:

1. Describe the components of food and nutrition systems and discuss the development of food and nutrition policies
2. Describe and discuss methods for assessing nutritional status and nutrition surveillance strategies
3. Describe and discuss key principles employed in developing health promotion strategies
4. Describe and critique approaches to program planning and evaluation and apply a planning model to a community nutrition issue
5. Describe community and public health nutrition services and programs in Australia
6. Discuss public health nutrition issues

Subject Description

The subject covers the key areas of community and public health nutrition, including food and nutrition monitoring and surveillance, food and nutrition systems; food and nutrition policy; program planning, development and evaluation; and principles of nutrition promotion. Issues related to advocacy for policies and programs to address public health nutrition priorities will be introduced. Current issues in Public Health Nutrition in Australia and elsewhere will be reviewed. Submission of some assignment work via eLearning Space.

eLearning Space

This subject has materials and activities available via eLearning. To access eLearning you must have a UOW user account name and password, and be enrolled in the subject. eLearning is accessed via SOLS (student online services). Log on to SOLS and then click on the eLearning link in the menu column. For information regarding the eLearning spaces please use the following link:
http://uowblogs.com/moodlelab/files/2013/05/Moodle_StudentGuide-1petpo7.pdf

Lecture, Tutorial, Laboratory Times

All timetable information is subject to variation. Check latest timetabling information on the ‘Current Student’ webpage on UOW website or log into SOLS to view your personal timetable prior to attending classes. http://www.uow.edu.au/student/index.html

Timetable information can be accessed from

Key University Dates can be accessed from

Readings, References and Materials

Textbooks
The following text(s) will need to be purchased by students enrolled in this class.

Prescribed Readings (includes eReadings)
The following text is prescribed for this subject, but students are not expected to purchase these. They are available to students through the library on the subjects eLearning site.

Materials
Nil

Recommended Readings
The list of recommended readings will be placed on the Moodle website.

Recent Changes to this Subject

### Details of Assessment Tasks

Assessment tasks will be marked using explicit criteria that will be provided to students prior to submission.

**Assessment 1**
- **MCQs on Food and Nutrition Systems and Food Regulations**
- **Due date**: 19/03/2015 (18:00)
- **Weighting**: 10%
- **Submission**: Submit quiz electronically in eLearning
- **Type of Collaboration**: Individual Assessment
- **Length**: 1 hour (timed quiz)

#### Details

This is a timed web-based multiple choice quiz taken independently in weeks 3. Students can log on at their convenience to undertake the quiz between 18:00 on Wednesday 16/05/2015 and 18:00 on Saturday 19/03/2016, they may only log on once and access will automatically cut out after 60 mins. Ten randomized questions will be based on lecture and reading material provided in weeks 1 – 3 of the class.

The quiz will be marked on the number of correct choices made in the multiple choice design. There is only one correct answer per question.

**Style and format**: Online quiz

**Subject Learning Outcomes**: 1

**Marking Criteria**: Assessment 1 will be marked using the following criterion:
1. Number of correct answers /10marks
Assessment 2

MCQs on Nutrition Monitoring and Surveillance, Public Health Nutrition Priorities, PHN Services and Programs in Australia, and Nutrition Promotion

Due date
23/05/2015 (18:00)

Weighting
15%

Submission
Submit quiz electronically in eLearning

Type of Collaboration
Individual Assessment

Length
1.5 hours (timed quiz)

Details
This is a timed web-based multiple choice quiz taken independently in week8. Students can log on at their convenience to undertake the quiz between 18:00 on Wednesday 20/05/2016 and 18:00 on Saturday 23/05/2016, they may only log on once and access will automatically cut out after 60 mins. Fifteen randomized questions will be based on lecture and reading material provided in weeks 4 – 8 of the class.

The quiz will be marked on the number of correct choices made in the multiple choice design. There is only one correct answer per question.

Style and format
Online quiz

Subject Learning Outcomes
1, 2, 3, 5

Marking Criteria
Assessment 2 will be marked using the following criterion:
1. Number of correct answers /15marks

Assessment 3

Needs Assessment and Program Planning Form

Due date
Written: Hand to tutor in allocated tutorial group of Week 11
Group oral presentations either in Tut 6 (Week 11) or Tut 7 (Week 12).

Weighting
35%

Submission
Submit a hard copy of the slides within your tutorial group on the day of presentation. Submit the completed program planning form to tutor in Week 11 tutorial.

Type of Collaboration
Individual Project (Part A: Sections 1 and 2) and Group presentation and written report (Part B)

Length
A maximum of 6000 words, excluding figures/tables (and their associated captions), references and appendices only. Subheadings are counted towards the word count.

Details
Students work individually on this assignment. Tutorial time will be provided in week 8 for this assignment. You should start your assessment early as this is a time-consuming assessment. The second part of the assessment is a presentation of the planned intervention. This will be done with another student who has been allocated the same topic. Together you will need to identify a target age/sex group, for example 0-5 year old child; 25 - 40 year old woman; 55-70 year old man etc. . Topics will be provided in tutorials and thereafter you can decide on your target population group once you complete your needs assessment (Part A).

PART A – Needs Assessment

Section 1 – maximum 1,500 words recommended. For your selected population group:

i. Using Australian population nutrition and health data, provide a brief introduction to the selected key nutritional (e.g. nutrient deficiency) or nutrition-related health problem (e.g. obesity) and/or challenge. Identify a target population age group for which the public health issue is a major concern.

ii. Describe and appraise the nutrition and health data sources used (types, sources & quality) to identify this issue.

iii. Describe the extent of the problem in Australia

iv. Discuss the quality and scope of Australian data used to identify this
issue, identifying any issues of concern related to the available data, and compare this to the range and quality of data available in one (1) other country. All data sources must be fully referenced.

Section 2 – maximum 2,000 words recommended

For the issue you have identified in part 1:

i. Undertake a literature review of a range of strategies that have been used to impact on this issue in Australia and one other country (at least 3 strategies for each country).

ii. Critically discuss each of these strategies and their reported effectiveness.

iii. Identify any differences in the types of strategies that have been used in the two countries.

iv. Conclude your review by identifying the most effective strategy in the Australian context.

v. Provide details of the search strategy that you employed in your literature review, including key words and combinations, databases searched, limitations you placed on your search and the criteria you used to select the articles you have incorporated into your paper. Include the first 2 pages of one of your database searches as Appendix.

PART B – Program planning form.

Construct a nutrition promotion program to address your selected issue in the community. Ensure that your program covers a range of health promotion strategies and principles. Complete the Program Planning Form (available on the eLearning site) and present the plan as a 10-minute presentation, using the sub headings provided in the program planning form. You will also be required to hand in a written copy of the completed planning form, and the communication plan (electronically) and a copy of the slides (6 to a page) to the tutor/lecturer within your tutorial group.

Style and format

Program planning form

Subject Learning Outcomes

1-6

Marking Criteria

Assessment 3 will be marked using the following criteria:

1. Relevant nutrition issue and data sources identified 20%
   - Identification of an appropriate nutrition / nutrition-related issue
   - Identification and critical appraisal of data types and sources from Australia
   - Description and prevalence estimates for issue given based on identified data
   - Comparison of Australian nutrition data to another country
   - Discussion of two major issues relating to Australian data

2. Literature review 25%
   - Range of intervention strategies included
   - Critical appraisal of strategies and their effectiveness
   - Comparison between countries
   - Conclusions drawn- Search strategy

5%

4. Relevant and realistic program developed and clearly described 30%

5. All aspects of the planning form completed and addressed appropriately 5%

6. Demonstrates an understanding of program planning concepts/terms 5%

7. Communication plan (written submission) 5%

8. Oral presentation skills, clarity of slides etc. 10%

Total / 100%
**Assessment 4**  
Government Submission and Advocacy Plan

</tr>
</tbody>
</table>

Details
- An electronic copy must be submitted on Moodle by 4pm on the due date.
- Write a submission to government about one (1) of the following public health nutrition issues:
  - Healthy food in public places or
  - Food security
- For your selected issue:
  1. Write a formal submission to government on this topic/one aspect of this topic. This should include a background on the issue, a persuasive argument on the need for action and a ‘call to action’ or what you want government to do about this issue.
  2. Provide a summary of advocacy activities that you would undertake to support this submission. Describe what and who these activities would involve, when you would do these and your reasons for undertaking these activities.

Minimum Requirements for a Pass in this Subject
To receive a clear pass in this subject a total mark of 50% or more must be achieved. In addition, failure to meet any of the minimum performance requirements is grounds for awarding a Technical Fail (TF) in the subject, even where total marks accumulated are greater than 50%.

The minimum performance requirements for this subject are:
- Attempt all assessment tasks
- Meet the minimum attendance requirements set out below.

Minimum Student Attendance and Participation
It is expected that students will allocate 16 hours per week to this subject, including any required class attendance, completion of prescribed readings and assessment tasks.

Student attendance at tutorials compulsory and students must attend at least 80% of classes. Absences will require the submission of an application for Academic Consideration via SOLS and the presentation of suitable documentation, for example a Medical Certificate, to Student Central as soon as practical. For further details about applying for academic consideration visit the Student Central webpage: [http://www.uow.edu.au/student/central/academicconsideration/index.html](http://www.uow.edu.au/student/central/academicconsideration/index.html)
Scaling
Scaling will not occur in this subject.

Late Submission
Late submission of an assessment task without an approved extension of the deadline is not acceptable. If you are unable to submit an assessment due to extenuating circumstances (e.g. medical grounds or compassionate grounds), you can make an application of academic consideration. Not all circumstances qualify for academic consideration. For further details about applying for academic consideration visit the Student Central webpage: http://www.uow.edu.au/student/central/academicconsideration/index.html

Late Submission Penalty
Marks will be deducted for late submission at the rate of 5% of the total possible marks for that particular assessment task per day. This means that if a piece of work is marked out of 100, then the late penalty will be 5 marks per day (5% of 100 possible marks per day). The formula for calculating the late penalty is: the total possible marks x 0.05 x number of days late. For the purposes of this policy a weekend (Saturday and Sunday) will be regarded as two days.

For example:

- Student A submits an assessment which is marked out of 100. The assessment is submitted 7 days late. This means that a late penalty of 35 marks will apply (100 x 0.05 x 7). The assessment is marked as per normal out of 100 and is given a mark of 85/100, and then the late penalty is applied. The result is that the student receives a final mark of 50/100 for the assessment (85 (original mark) – 35 marks (late penalty) = 50/100 (final mark)).

- Student B submits a report which is marked out of 20. The report is submitted three days late. This means that a late penalty of 3 marks will apply ((20 x 0.05 x 3). The report is marked as per normal out of 20 and is given a mark of 17/20, and then the late penalty is applied. The result is that the student receives a final mark of 14/20 for the report (17 (original mark) – 3 marks (late penalty) = 14/20 (final mark)).

No marks will be awarded for work submitted either after the assessment has been returned to the students or more than two weeks after the due date, whichever is the sooner. This does not apply to situations where a particular assessment task is undertaken by students at different times throughout the session, but where the assessment is based on experiments or case studies specific to a student. In this case no marks will be awarded for work submitted more than two weeks after the due date.

Notwithstanding this, students must complete all assessment tasks to a satisfactory standard and submit them, regardless of lateness or loss of marks, where submission is a condition of satisfactorily completing the subject.

System of Referencing Used for Written Work
The Author-Date (Harvard) referencing system should, unless otherwise specified for a particular assessment (check Details of Assessment Tasks), be utilised. A summary of the Harvard system can be accessed on the Library website at: http://public01.library.uow.edu.au/refcite/style-guides/html/

Use of Internet Sources
Students are able to use the Internet to access the most current information on relevant topics and information. Internet sources should only be used after careful critical analysis of the currency of the information, the role and standing of the sponsoring institution, reputation and credentials of the author, the clarity of the information and the extent to which the information can be supported or ratified by other authoritative sources.
Plagiarism
The full policy on Academic Integrity and Plagiarism is found in the Policy Directory on the UOW website.

“The University’s Academic Integrity and Plagiarism Policy, Faculty Handbooks and subject guides clearly set out the University’s expectation that students submit only their own original work for assessment and avoid plagiarising the work of others or cheating. Re-using any of your own work (either in part or in full) which you have submitted previously for assessment is not permitted without appropriate acknowledgement. Plagiarism can be detected and has led to students being expelled from the University.

The use by students of any website that provides access to essays or other assessment items (sometimes marketed as ‘resources’), is extremely unwise. Students who provide an assessment item (or provide access to an assessment item) to others, either directly or indirectly (for example by uploading an assessment item to a website) are considered by the university to be intentionally or recklessly helping other students to cheat. This is considered academic misconduct and students place themselves at risk of being expelled from the University.”

Submission of Assessments
Refer to the submission requirements under the details of the individual assessments. Students should ensure that they receive a receipt/evidence acknowledging assessment submission. Students will be required to produce this in the event that an assessment task is considered to be lost. Students are also expected to keep a copy of all their submitted assignments in the event that re-submission is required.

Assessment Return
Students will be notified when they are able to view their marked assessment. In accordance with University Policy marked assignments will usually only be held for 21 days after the declaration of marks for that assignment.
Section C: General Advice

Students should refer to the Faculty of Science, Medicine and Health website for information on policies, learning and support services and other general advice.

University Policies

Students should be familiar with the following University policies:

a. Code of Practice – Teaching and Assessment

b. Code of Practice – Research, where relevant

c. Code of Practice – Honours, where relevant

d. Student Charter

e. Code of Practice – Student Professional Experience, where relevant

f. Academic Integrity and Plagiarism Policy

g. Student Academic Consideration Policy

h. Course Progress Policy

i. Graduate Qualities Policy

j. Academic Complaints Policy (Coursework and Honours Students)

k. Policy and Guidelines on Non-Discriminatory Language Practice and Presentation

l. Workplace Health and Safety, where relevant

m. Intellectual Property Policy

n. IP Student Assessment of Intellectual Property Policy, where relevant

o. Policy on Ethical Objection by Students to the Use of Animal and Animal Products in Coursework Subjects, where relevant

p. Human Research Ethics Guidelines, where relevant

q. Animal Research Guidelines, where relevant
r. Student Conduct Rules and accompanying Procedures or Research Misconduct Policy for research students

Student Support Services and Facilities
Students can access information on student support services and facilities at the following link. This includes information on “Academic Support”, “Starting at University”, “Help at University” as well as information and support on “Career’s and Jobs”. http://www.uow.edu.au/student/services/index.html

Student Etiquette
Guidelines on the use of email to contact teaching staff, mobile phone use in class and information on the university guide to eLearning ‘Netiquette’ can be found at http://www.uow.edu.au/student/elearning/netiquette/index.html
