Australian War Memorial (lower level): BAE Systems Theatre

AUSTRALIAN Conference on Physiological and Physical Employment Standards (1st; 2012; Canberra, Australia)

Publisher: University of Wollongong (Australia, 2012): published on behalf of the organisers. © Copyright Reserved.
TABLE OF CONTENTS

BAE SYSTEMS THEATRE: Tuesday 27th November

SESSION ONE: OPENING SESSION (10:00-11:10):
Opening Address One: Alexander Zelinsky, Chief Defence Scientist and Head of the Defence Science and Technology Organisation (Australia).

Opening Address Three: Paul Welling, Vice Chancellor, University of Wollongong.

Guest Speaker One: Gerard Fogarty, Head of People Capability, Australian Defence Force. Physiological employment standards: A military perspective.

SESSION TWO: ORAL PRESENTATIONS (11:30-12:55): FOCUS: UK:
Michael J. Tipton, Gemma S. Milligan, Tara J. Reilly (UK): Fitness standards: objectively subjective? ................................................................. 10

Gemma S. Milligan, James R. House, Michael J. Tipton (UK): A recommended fitness standard for the oil and gas industry ............................................................... 11

Gemma S. Milligan, Tara J. Reilly, Michael J. Tipton (UK): A review of the fitness standard for the Royal National Lifeboat Institution boat crew .............................................. 13

Michael Spivock, Daniel Théoret and Assane Niang (Canada): Triage: taming the qualitative beast for quantitative researchers in the identification of tasks on which to base physical employment standards ........................................... 15

Gregory S. Anderson, G. Girard, D. Plecas (Canada): Re-evaluation of the physical abilities readiness evaluation: phase I - task analysis ................................................................. 17

SESSION THREE: POSTERS (Courtyard Gallery: Posters over Lunch: 13:00-13:40):
Gemma S. Milligan, James R. House, Michael J. Tipton (UK): A Recommended fitness standard for the Maritime and Coastguard Agency .................................................. 19

Sean R. Notley, Hugh H.K. Fullagar, Simon D. Burley, Daniel S. Lee, Nigel A.S. Taylor (Australia): Observations on the predictive utility of heart rate and minute ventilation for estimating the metabolic cost of work ........................................................................ 21

N. Meigh, M. Steele and Robin M. Orr (Australia): Metabolic fitness as a predictor of injury risk in conditioned military trainees undertaking an arduous field training exercise ............ 23

Gregory S. Anderson, G. Girard, D. Plecas (Canada): Re-evaluation of the physical abilities readiness evaluation: Phase II - discrete item analysis ......................................................... 24

Helen Kilding and Bryan Dobson (New Zealand): Estimation of the physical demand of the Royal New Zealand Navy first AID/EEBD run ................................................................. 26
Veronica K. Jamnik, Robert J. Gumieniak and Norman Gledhill (Canada): On legally defensible physical employment standards................................................................................................................................. 28
Robin Callister (Australia): Development of a pre-employment fitness test for university Security Officers........................................................................................................................................ 30
Paddy C. Dempsey, Phil J. Handcock (New Zealand): Testing our Police: how safe? .................. 31
Michael Willis and Michael Landsbergen (Australia): Cultivating a healthy and resilient workforce........................................................................................................................................... 33
Stewart Petersen, David Docherty, William McGarvey, Todd Rogers (Canada): Use of the bookmark procedure to set a performance standard for the Canadian Forces firefighter fitness maintenance test................................................................................................................................. 35

SESSION FIVE: ORAL PRESENTATIONS (15:25-16:35): FOCUS: Fire fighting:
Alison Donohoe (Australia): Contemporary physical and medical standards for Fire & Rescue NSW........................................................................................................................................ 37
Nigel A.S. Taylor, Hugh H.K. Fullagar, John A. Sampson, Herbert Groeller (Australia): The physiological and physical demands of contemporary fire fighting: simulations performed by operational firefighters........................................................................................................................................ 39
Hugh H.K. Fullagar, John A. Sampson, Sean R. Notley, Simon D. Burley, Daniel S. Lee, Herbert Groeller, Nigel A.S. Taylor (Australia): The physically demanding and critical tasks performed by retained and permanent firefighters........................................................................................................................................ 41
Herbert Groeller, Hugh H.K. Fullagar, John A. Sampson, Nigel A.S. Taylor (Australia): Recommended screening tests for contemporary firefighters................................................................................................................................. 43

SESSION SIX: ORAL PRESENTATIONS (16:50-17:45):
Yoram Epstein, Ran Yanovich, Daniel S. Moran and Yuval Heled (Israel): Physiological and medical considerations within mixed-gender military units................................................................................................................................. 45
Klaas R. Westerterp (The Netherlands): Body fat and physical activity................................................................................................................................. 46
Nigel A.S. Taylor (Australia): A commentary on endurance fitness standards applied to occupations that involve load carriage and manual handling................................................................................................................................. 48

MUSEUM TOUR (guided: 17:45) THEN CONFERENCE DINNER (BBQ)

END OF DAY ONE
BAE SYSTEMS THEATRE: Wednesday 28th November

SESSION SEVEN: ORAL PRESENTATIONS (08:00-09:25): FOCUS: Injuries:
Stephan Rudzki (Australia): Why do we break military personnel?............................................. 50
Paddy C. Dempsey, Phil J. Handcock, Nancy J. Rehrer (New Zealand): Body armour: a problem with the equipment or the wearer?.......................................................... 52
Robin Orr, Rodney Pope, Venerina Johnston, and Julia Coyle (Australia): The operational load carriage context of the Australian Army soldier.......................................................... 54
Martin van der Linden (Australia): The role of pre-employment assessments in a multifaceted approach to injury prevention in an emergency service - a fifteen year longitudinal perspective.......................................................... 56
Jennifer B. Legge, Robin Burgess-Limerick and Geeske Peeters (Australia): Pre-employment functional assessments predict musculoskeletal injury risk in healthy male coal mine workers.......................................................................................................................... 58

SESSION EIGHT: ORAL PRESENTATIONS (09:45-10:50): FOCUS: USA:
Bradley Nindl, Marilyn Sharp (USA): Physiological challenges and consequences encountered during international military deployments........................................................................ 60
Barry A. Spiering, Leila A. Walker, Kathleen Simpson, Peter N. Frykman, Reeshemah C. Ward, Stephen C. Allison, Marilyn A. Sharp (USA): Reliability of a battery of soldiering task tests.................................................................................................................. 61
Marilyn A. Sharp, Leila A. Walker, Barry A. Spiering, Kathleen Simpson, Peter N. Frykman and Stephen C. Allison (USA): Correlations between laboratory measures of physical fitness and soldier task performance.................................................................................. 63
Edward J. Zambraski (USA): Development of “exercise dosimetry” to address musculoskeletal injuries within the military.................................................................................................................. 65

SESSION NINE: ORAL PRESENTATIONS (11:00-12:10): FOCUS: Canada:
Daryl Allard, Suzanne Jaenen, Michael Spivock, and Patrick Gagnon (Canada): Implementing physical employment standards in large organisations........................................................................ 66
Tara Reilly, Rachel Blacklock and Philip Newton (Canada): Quantifying performance standards of the common and essential tasks required of the Canadian Forces. Phase II........................................................................ 68
Michael Spivock, Rachel Blacklock, Philip Newton, Barry Stockbrugger, Katharine O’Hearn, Assane Niang, Tara Reilly (Canada): Establishing a baseline physical employment standard for the Canadian Forces: Project Force.................................................................................. 70
Daniel Théoret, Stacey Bain, Anna Fuite, Paige Mattie, Assane Niang, Sarah Saucier (Canada): Establishing occupational fitness standards in the Canadian Forces: a review of non-commissioned and officer occupations in the Royal Canadian Navy........................................................................ 72

Sam D. Blacker, Victoria L. Richmond, David M. Wilkinson, James M. Carter and Mark P. Rayson (UK): Development of gender-free role-related physical tests for the British military and United Kingdom emergency services.................................................................................. 74
Brianna Larsen, Tony Graham, Brad Aisbett (Australia): A survey to identify physically demanding tasks performed during storm damage operations by Australian State Emergency Services personnel........................................................................ 76
Robert Savage, Benjamin Beck, Greg Carstairs, Laura Holland, Timothy Doyle (Australia): Dynamic lifting performance amongst military populations ......................................................... 77
Michael Spivock, Paige Mattie, Jennifer Lee (Canada): The warrior fitness training program: a follow-up study on recruits who were unable to attain the baseline physical employment standard upon entry to the Canadian Forces ................................................................. 79
Nigel A.S. Taylor and Elizabeth A. Taylor (Australia): How much money could fire brigades save annually simply by increasing firefighter fitness? ......................................................... 81

SESSION ELEVEN: ORAL PRESENTATIONS (13:10-14:25): FOCUS: Australia:
Timothy L.A. Doyle and Daniel C. Billing (Australia): Methodological approach to the development of physical employment standards for the Australian Defence Force ........ 83
Amelia Carr, Jace Drain, Michael Lewis (Australia): Valid cardiovascular endurance assessments for direct combat roles in the Australian Army must incorporate load carriage .......... 85
Andrew Hunt, Aaron Silk, and Paul Tofari (Australia): The effect of load carriage on the performance of tactical movements in the Australian Army .......... 87
Ryan J. Holmes (Australia): Implementing physical employment standards - the Australian Army experience ........................................................................................................ 91

SESSION TWELVE: ORAL PRESENTATIONS (14:35-15:35):
Bianna Larsen and Brad Aisbett (Australia): Subjective job task analyses for physically demanding occupations: what is best practice? ................................................................. 93
Cara Lord, Rod Snow, Brad Aisbett (Australia): Rationale for the use of physical selection tests in physically demanding occupations: a review of the evidence ........................................ 94
Sam D. Blacker, David M. Wilkinson and Mark P. Rayson (UK): Development of a gender-free role-related physical strength test for British Army applicants ........................................ 95
Sam D. Blacker, David M. Wilkinson and Mark P. Rayson (UK): Developing, implementing and refining physical selection standards for the British Army ................................................................ 97

SESSION THIRTEEN: ORAL PRESENTATIONS (15:55-16:55):
Denise M. Linnane and Dan C. Billing (Australia): Methodological approach to the development of physical employment entry standards for the Australian Army ................................................................. 99
Moses N. Shaba (South Africa): Development of scientific selection criteria for physically demanding post profiles ............................................................................................ 101
Helen Kilding and Bryan Dobson (New Zealand): Development of a simulated body drag for the New Zealand Army ................................................................. 102

SESSION FOURTEEN: ROUND-TABLE DISCUSSION AND CLOSING (17:07-17:45):
Michael Tipton (UK): Chair and introduction ........................................ No abstract required
Veronica Jamnik (Canada): Determining valid standards ........ No abstract required
Reem Mina (Australia): Medical concerns relating to discrimination ................................................................. 106
Yoram Epstein (Israel): Matters of gender ........................................ No abstract required
Dan Billing and Tim Doyle (Australia): *Military employment standards must consider generic service requirements as well as employment category tasks and duties* ................................................... 107

Stephan Rudzki (Australia): *Injury minimisation* .................................................................................................................................................. 108

Daryl Allard (Canada): *Problems with implementation* .......... No abstract required ..............

**Closing Address:** Simon Oldfield, Chief Human Protection and Performance Division, Defence Science and Technology Organisation (Australia).

**CONFERENCE CLOSES (17:45)**
