Completing Faculty of SMAH Learning Statements

Generally, students who have studied nursing subjects at another institution find that the subjects they have completed do not transfer very well to the University of Wollongong’s Bachelor of Nursing courses. However, students can request credit for prior learning by submitting a Faculty of SMAH Learning Statement form and supporting documentation.

Please note that the learning outcomes and content need to match by not less than 80%. It is possible to use more than one subject from your previous studies along with knowledge, skills and competencies supported by appropriate evidence against a University of Wollongong subject but you cannot double count i.e. use the same material for more than one subject.

When you have completed your Faculty of SMAH Learning Statement form you need to submit the form, the outlines for your previous subjects, a certified transcript that provides evidence of your marks for those subjects, and any other supporting documentation, to StudentHub 41 (Building 41, Level 1).

StudentHub 41 staff will forward your application to the School of Nursing for assessment and you will receive a student email advising you of the outcome once a decision has been made.

If you have any questions about completing your form or about the supporting documentation you require, please contact StudentHub 41 via telephone 02 4221 3492, email smah-students@uow.edu.au or at the StudentHub 41 counter.
